The Politics and Ethics of Biotechnology

Learning Outcomes: by the end of the tutorial, students should:

Under stand the ethical, economic and political issues and discourses around biotechnology

Be able to separate out the ‘biotechnology debate’ into issues around the food, medical and other applications of genetic information

Understand the ethical and political arguments of those critical of biotechnology and genetic engineering

Be able to come to their own judgement as to the ethical status of biotechnology

SEMINAR PREPARATION

A. READING

Please read my unpublished paper Barry, J, ‘GM Food, Biotechnology, Risk and Democracy in the UK: A Sceptical Green Perspective’, on QOL ‘ECPR Paper’.

Also please read ONE reading from the THREE sections.

B. QUESTIONS TO THINK ABOUT

Is biotechnology something to be feared? What are the reasons for peoples’ fears around biotechnological developments?

How much of the controversy around biotechnology has to do with the non-democratic, secret manner in which this technology develops?

What are the ethical issues that one must consider in assessing biotechnology?

What the political issues?

What are the economic issues?
