

Queen's University of Belfast

School of Politics

Environmental Politics

210POL346

Second Semester 2002-2003

MODULE DESCRIPTION

This module explores the normative, economic, political and cultural dimensions of the politics of the environment. It traces the origins of the place of the 'environment' and 'nature' in western political thought, before proceeding to examining the idea that there is an 'environmental crisis' through an examination of arguments for and against this claim. The bulk of the first part of the module is taken up with the exploration of the various normative aspects of environmental politics, such as what are the grounds or reasons for caring about the environment, as well as looking at the main aspects of green moral and political theory. It then goes on to compare and contrast green normative theory to existing political ideologies such as Marxism, Socialism, Anarchism, Conservatism and Liberalism, before concluding with a session on the challenge of one of the key normative and empirical claims of green politics – namely sustainable development. The remaining three seminars are to be chosen by the students in consultation with the tutor.

MODULE AIMS AND LEARNING OUTCOMES

THE AIMS OF THIS MODULE ARE:

To provide students with a basic understanding of key concepts, ideas, and leading thinkers in Environmental Politics.

To introduce students to current debates and controversies in the discipline of Environmental Politics.

To give students the opportunity to analyse current environmental problems through an understanding of the nature of the interactions between environmental and political, economic, international and cultural actors, institutions and processes.

To stimulate independent learning about environmental politics by encouraging and helping students develop their own understanding of the subject.

To equip students with basic intellectual skills (e.g. critical thinking, analysis, listening, problem solving).

To encourage student independent learning and taking responsibility for their own learning, by a) using seminars as the mode of teaching and requiring students to come to each seminar prepared, b) requiring students to choose their own essay titles in consultation with the tutor and finally c) requiring students to choose three of the topics

to be studied, in consultation with the tutor.

UPON COMPLETION OF THIS MODULE, STUDENTS SHOULD BE ABLE TO:

Understand the main approaches to the study of Environmental Politics, including current theoretical developments in the discipline.

Come to their own assessment and understanding of Environmental Politics, including some of the major thinkers and debates within the subject.

Outline and understand the main claims, positions and views of green political theory. Communicate ideas to others in a clear and concise manner, both orally and in written form.

Work together with other students on set tasks when required.

Pursue intellectual questions in a rigorous and academic manner, employing analytical skills and critical thinking.

MODULE ORGANISATION

Module Convenor Dr. John Barry, Room 21.202, email: [HYPERLINK "mailto:j.barry@qub.ac.uk" j.barry@qub.ac.uk](#)

Office Hours: Mondays & Tuesdays 9-10 or by appointment	
Seminar information	Mondays 10-12, Room 19.103
Queen's Online	This module guide will be made available online.

METHOD OF ASSESSMENT

You are expected to attend EVERY weekly seminar.

You will be expected to come to each seminar prepared with ALL relevant reading or other suggested preparation done. Seminar preparation will be made up of two parts – 1. having the required reading done and 2. having thought about and have answers to questions specific to each topic which will form the basis for seminar discussion.

You are required to submit TWO essays of between 2,500 and 3,000 words each. The essays must include a bibliography and quotations should be referenced.

*You are also **STRONGLY ENCOURAGED** to complete two non-assessed pieces of work:*

(1) An Academic Diary which should be written up on a weekly basis as part of the preparation for seminars (providing an opportunity to reflect upon the questions

provided as preparation for each seminar, as well as written evidence of having done so), and in which you should also record your views, thoughts and observations about the module, in particular keeping a record of what's happening in the world, the university, Northern Ireland or your life which relates the themes of the module

(2) A 500-750 word book review of a book to be chosen by students in consultation with the tutor. All reviews will be emailed to each student.

You must submit **TWO** essays each of which account for 50% of your final grade.

The **FIRST** essay must be handed into the MAIN office in Politics on **Friday 22nd March** before 4.30pm.

The **SECOND** essay must be handed into the MAIN office in Politics on **Friday 10th May** before 4.30pm.

Be sure to collect a receipt for each essay.

IMPORTANT NOTE ON SUBMISSION OF LATE COURSEWORK:

QUB regulations state that late coursework is penalised at 5% per each working day (Mon-Fri), for up to 5 days after the due date, after which the coursework will receive an automatic 0. The School of Politics has implemented this policy. Students requiring extensions for medical or other reasons MUST fill out an extension form in the Main Office.

IMPORTANT NOTE ON PLAGIARISM:

*The School of Politics takes a very severe line on students who plagiarise work. Students who attempt to pass off another's work as their own will receive a mark of **ZERO**. In some cases, acts of plagiarism can result in the student failing the entire degree. Remember, plagiarism includes information from books, newspapers, journals AND the Internet. Please refer to the Politics handbook for more information about referencing and plagiarism: [HYPERLINK http://www.qub.ac.uk/pol/study_files/plagiarism.htm](http://www.qub.ac.uk/pol/study_files/plagiarism.htm) http://www.qub.ac.uk/pol/study_files/plagiarism.htm*

IMPORTANT NOTE ON RESITS AND RESUBMISSIONS:

*If you fail the course, QUB regulations allow you to re-sit exams or re-submit your coursework for a **MAXIMUM** mark of 40. For final year students, exam re-sits take place during the May / June exam period, and course work re-submissions must be handed in by Friday, May 30th, 2003. For all first and second year students, exam re-sits take place during the re-sit session in August (usually from mid-August until the end of the month). Re-submission of course work must be handed in by Friday, August 22nd, 2003. **It is the student's responsibility to contact the School of Politics to find out about re-sits and re-submissions.***

ESSAYS:

The essay questions/ titles/topics for the two essays are to be composed by the student in consultation with the tutor.

It is the student's responsibility to make arrangements to come and see the tutor to discuss their choice of essays topics.

Essay 1: Students should come and see the tutor and have chosen their essay title by

Friday 7th March (essay deadline is Friday 4th April).

Essay 2: Students should come and see the tutor and have chosen their essay title by

Monday 28th April (essay deadline is Friday 9th May).

SEMINARS

The seminars will be two hours long, with a break mid-way.

The seminars will be organised as follows: the seminar topic will be introduced by the tutor, who will then begin the discussion by asking students to comment and discuss the various questions specified for that seminar. The tutor will co-ordinate and chair the discussion and also clarify any issues students do not understand, either based on their seminar reading preparation, the tutor's introductory remarks or the ensuing seminar discussion. A variety of teaching methods will be used in consultation with the students: lectures, student presentations, small group teaching and group work, debates, poster presentations, question and answer sessions, appointing a student chair, and appointing someone to record the main points/issues of each session etc.

Seminars are only as good as the preparation that students do, and the willingness and enthusiasm of students to contribute to the discussion, listen to the views of others and ask questions, and seek clarification when needed. Seminars are based upon student independent learning and students will be required to take responsibility for their own learning in co-operation with the tutor. Given the extensive reading list for each seminar, there will be no excuse for not having read both the required readings (usually 2) and a variety of other readings. The extensive reading list is not meant to intimidate nor is it expected that all the indicated readings will be covered, but rather to ensure that students read DIFFERENT readings/approaches etc., so that in seminars we get a good variety of views, opinions and arguments.

SEMINAR SCHEDULE:

WEEK	MONDAY 9-10	TOPIC
One	Jan. 27 th	Introduction (including choosing the last 3 seminar topics)
Two	Feb. 3 rd	The Uses and Abuses of Nature in the History of Social, Political, Religious and Economic Thought
Two	Feb. 5 th	There will be a video presentation relating to next week's seminar in 19.103
Three	Feb. 10 th	Is there an Environmental Crisis?: The Ecological Critique and Responses
Four	Feb. 17 th	Why Care for the Environment?: The Ethical and Political Status of Nature
Five	Feb. 24 th	Green Moral and Political Theory
Six	Mar. 3 rd	Gender and the Environment
Seven	Mar. 10 th	The Environment and Political Ideologies: Marxism, Socialism, Anarchism, Conservatism and Liberalism
Eight	*Mar. 17 th (to be rearranged)	Sustainable Development and Green Political Economy: The Greening or the Transcending of Capitalism?
Nine	Mar 24 th	Topic to be chosen by students in consultation with tutor

Ten	March 31 st	Topic to be chosen by students in consultation with tutor
EASTER	April 4th – April 25th –	No Lectures during Easter Break
Eleven	Apr. 28 th	Topic to be chosen by students in consultation with tutor
Twelve	**May 5 th	Module Summary/ Overview

* **St Patrick's Day**

** **May Day Bank Holiday**

TEXTBOOK

The main textbook for this module is:

Barry, J (1999), *Environment and Social Theory* (Routledge) which you are strongly encouraged to purchase – copies available from the QUB Bookshop.

Other good textbooks include:

Dobson, A (2000), *Green Political Thought* (3ed ed) (Routledge)

Connolly, J & Smith, G (1999), *Politics and the Environment* (Routledge)

All three are available in the library.

REFERENCE BOOKS

Useful reference books include:

Barry, J & Frankland, E.G (eds), *International Encyclopedia of Environmental Politics*, [GE170/BARR]

Goodin, Robert E. (ed) *The Politics of the Environment* [HC79.E5/GOOD]

Cunningham, W et al (eds), *Environmental Encyclopedia* [R/ GE18/CUNN]

JOURNALS & MAGAZINES

Many of the broadsheets have a weekly environment section, but the best and longest established one is *The Guardian* every Wednesday in 'G2'.

The Ecologist is always worth flicking through for recent environmental issues and debates.

Academic journals worth consulting for articles related to the module include:

Ethics and the Environment [available electronically]; *Journal of Applied Philosophy*, *The Ecologist*, *Resurgence*, *Antipode*, *Telos*, *Theory, Culture and Society*, *Philosophy and Public Affairs*, *Ethics*, *Ecological Economics*

INTERNET RESOURCES

There are thousands of environmental and green sites, some are academic, some are government related and many are maintained by environmental groups, green parties, movements and activists.

Some good places to start your search are:

SEMINAR TOPICS AND READINGS

Monday 3rd February: 10-12

Topic 1

The Uses and Abuses of Nature in the History of Social, Political, Religious and Economic Thought

Learning Outcomes: by the end of the tutorial, students should:

Have an appreciation of the different ways in which nature and the environment have been conceived and used in the history of western thought.

Come to their own assessment of the normative or other outcomes particular readings and understandings of nature and the environment have been employed to achieve and maintain.

Understand the normative and political significance of particular readings and views of nature.

Understand the continuing relevance and importance of the 'Promethean myth' for analysing contemporary environmental politics in theory and practice.

SEMINAR PREPARATION

A. READING

Barry, J, *Environment and Social Theory*, chapters 1-2, and at least ONE reading from EACH of the other sections

B. QUESTIONS TO THINK ABOUT

How is 'nature' distinguished from 'environment' in the history of western thought?

Are there any similarities in the ways in which the environment and nature have been conceived in the history of western religious thought?

Why are concepts like 'nature' and 'natural' so powerful politically and normatively?

How is 'external nature' related to 'internal/human nature'?

How and in what ways did the romantic movement and critique of industrialisation view nature?

1. Nonhuman Nature in Western Thought

Coates, P, *Nature: Western Attitudes since Ancient Times* [GE50/COAT]

Glacken, C, *Traces on the Rhodian Shore: Nature and Culture in Western Thought from Ancient Times to the end of the Eighteenth Century* [GF31/GLAC]

Passmore, J, *Man's Responsibility for Nature* [GF51/PASS]

Wall, D, *Green History: A Reader in Environmental Literature, Philosophy and Politics* [GE195/WALL]

Pepper, D, *The Roots of Modern Environmentalism* [HC79.E5/PEPP]

Crosby, A, *Ecological Imperialism: The Biological Expansion of Europe* [GF75/CROS]
Hargrove, E, *Foundations of Environmental Ethics* [GF80/HARG]
Morgan, P, 'Religions and the Environment' in Barry, J & Frankland, E.G (eds), *International Encyclopedia of Environmental Politics* [GE170/BARR]
Thomas, K, *Man and the Natural World: Changing Attitudes in England 1500-1800* [GF551/THOM]

2. The Renaissance and the Enlightenment

Locke, J, *Two Treatises of Government*
Bacon, F, (1968), *Works*
Descartes, R, *Discourse on Method*
Hume, D, *Treatise on Human Understanding*
Rousseau, J, *Discourses, Emile*

Malthus, T, *An Essay on the Principle of Population* [HB861/MALT]
Polanyi, K, *The Great Transformation*, [HC51/POLA]

3. The Romantic Backlash I: The American Transcendentalists

Nash, R, *Wilderness and the American Mind* (2nd ed) [E169.1/NASH]
Thoreau, H, *Walden* [PS3048/NEW]
Buell, L, *The Environmental Imagination: Thoreau, Nature Writing and the Formation of American Culture*, [PS3057.N3/BUEL]
Emerson, R, W, *The Collected Works of Ralph Waldo Emerson* [PS1600/WORK]

4. The Romantic Backlash II: The British Romantics

Clayre, A (ed.), *Nature and Industrialization* [PR449.I8/CLAY] (Ch.IV)
Moriss, W, *News from Nowhere* [PR5080/ZZCO]
Mill, J.S. 'On Nature', in Clayre, A *Nature and Industrialization* [PR449.I8/CLAY] (Ch.XIX)
Bate, J, *Romantic Ecology: Wordsworth and the Environmental Tradition* [PR5892.N2/BATE]
Roe, Nicholas, *The Politics of Nature: Wordsworth and Some Contemporaries* [PR5892.P64/ROE]
Shelly, Mary, *Frankenstein: Or the New Prometheus* []

Wednesday 6th February: 1-3pm
Video presentation in 19.103

Monday 10th February: 10-12

Topic 2

Is there an Environmental Crisis?: The Ecological Critique and Responses

Learning Outcomes: by the end of the tutorial, students should:

Understand the main claims made by proponents and critics of ‘the ecological crisis’.
Be able to place the ‘limits to growth’ debate in its historical context and be able to trace it to the present day.

Come to their own view as to the strengths and weaknesses of the main arguments for and against the ‘ecological critique’.

SEMINAR PREPARATION

Everyone will be expected to attend the video presentation on Wednesday 5th February, and have read appropriate reading in preparation for a debate on the following topic, ‘The environmental crisis is real, getting worse and demands radical changes to be taken now to avoid catastrophe’ in which half the class will defend the motion and the other half dispute it.

A. READING

Barry, J, *Environment and Social Theory*, chapters 2-4, and at least ONE reading from EACH of the other sections.

B. QUESTIONS TO THINK ABOUT

What are the main arguments of those who claim there is an environmental crisis?

What is the evidence for the environmental crisis?

List the main environmental problems which make up the environmental crisis and rank them in order of severity/urgency?

What are the main arguments of those who dispute the ‘ecological critique’?

Who has the better of the argument, the ‘greens’ or their critics, and why?

General

Bramwell, A, *Ecology in the 20th Century* [QH541/BRAM]

Monday 17th February, 10-12

Topic 3
Why Care for the Environment?:
The Ethical and Political Status of Nature

Learning Outcomes: by the end of the tutorial, students should:

Have an appreciation of the main normative debates about the proper relationship between humans and the natural world.
Understand the differences between anthropocentric and ecocentric environmental ethical views.
Come to their own views as to where they stand on the ethical status of nature.

SEMINAR PREPARATION

A. READING

Connolly, J & Smith, G, 'Environmental Philosophy', Chapter 1 of *Politics and the Environment* [GE170/CONN]

And at least ONE reading from EACH of the other sections.

B. QUESTIONS TO THINK ABOUT

Why should we care about nature?
What are strengths and weaknesses of ecocentric and anthropocentric views about how we ought to treat and think about nature?
'The strongest moral and political grounds for caring for nature lies in our concern for future generations'. Do you agree and why?
What do we owe future generations in terms of the environment?
Do we need a new 'environmental ethic' and associated change in consciousness in order to cope with avoid environmental problems?
From your reading and your own thinking, can you come up with a basic set of moral

principles that ought to guide how we treat nature?

Do we treat nature badly out of ignorance? Badness? Arrogance? Because we're removed from it? Or all of these?

Topic 4

Green Moral and Political Theory

Learning Outcomes: by the end of the tutorial, students should:

Understand the main contours of green political theory in general and in particular its 'core' values, ideas and principles.

Understand the variety of conceptualisations and debates within green political theory.

Be able to relate and critically assess the different principles and aims of green political theory.

SEMINAR PREPARATION

A. READING

Barry, J, 'Green Political Thought', in Lent, A (ed), *New Political Thought* [JA81/LENT]

Barry, J, *Environment and Social Theory*, chapter 9.

And at least ONE reading from each of the other sections.

B. QUESTIONS TO THINK ABOUT

What, from your reading, are the core values, ideas, policies of a 'green' political perspective?

Is green politics simply an unstable combination of other ideologies such as anarchism, socialism and feminism?

What are the main issues at stake in the 'environmental-ecological' debate?

What are the strengths and weaknesses of the green position?

Having read and reflected on it, would you describe yourself as 'green'? If so, why? If not, why not?

What are the main barriers to the achievement of green political aims?

What are the discrepancies between green political theory and the policy positions of Green Parties and Movements?

1. Brief Overviews of Green Political Theory

Barry, J, 'Green Political Theory', in Barry, J & Frankland, E.G (eds), *International Encyclopedia of Environmental Politics*, [GE170/BARR]

Dobson, A, 'Ecologism', in Eatwell, R and Wright, A (eds), *Contemporary Political Ideologies* [JA83/EATW]

Freedan, M, *Green Ideology*, [pq JA75.8/FREE]

Yearley, S, 'Environmental Challenges', in Hall, S et al (eds), *Modernity and its Futures* [HM101/HALL]

Connolly, J & Smith, G, 'Green Ideology', in their *Politics and the Environment* [GE170/CONN]

Ball, T & Dagger (eds), *Ideals and Ideologies: A Reader* (2nd ed) [JA71/BALL]

Dagger, R, 'Green Politics: Ecology as Ideology', also in their *Political Ideologies and the Democratic Ideal*

Passmore, J, 'Environmentalism', in Goodin, R & Pettit, P (eds), *A Companion to Contemporary Political Philosophy* [JA71/GOOD]

Kenny, M, 'Ecologism', in Eccelshall, R *et al*, *Political Ideologies: An Introduction* (2nd ed) [JA71/ECCL]

Vincent, A, 'Ecologism' in his *Political Ideologies: An Introduction* (2nd ed) [JA71/HEYW]

Freedan, M (ed), *Reassessing Political Ideologies: The Durability of Dissent* [JA83FREE]

Rolston, H, 'Environmentalism', in Sterba, J (ed), *Social and Political Philosophy: Contemporary Perspectives* [HM671/STER]

2. Different Views/Conceptions of Green Political Theory

Barry, J, *Rethinking Green Politics*,

Dryzek, J, *The Politics of the Earth: Environmental Discourses* [GE195/DRYZ]

Dobson, A, *Green Political Thought* (3rd ed)

De-Shalit, A, *The Environment: Between Theory and Practice* [GE170/DESH]

March 3rd

Topic 5 Gender and the Environment

Learning Outcomes: by the end of the tutorial, students should:

Understand the various ways in which gender and ideas of ‘nature’, the environment’ and the ‘nonhuman’ have been used historically and in contemporary political debate.
Have a basic knowledge of different ecofeminist political viewpoints.
Come to their own assessment of the strengths and weaknesses of a gendered analysis of environmental politics, problems and struggles.
Be able to relate ecofeminist theoretical arguments and perspectives to real-world examples and practices.

SEMINAR PREPARATION

A. READING

Barry, J, 'Gender and the Environment', Chapter 5 of *Environment and Social Theory*, and at least ONE reading from EACH of the other sections.

B. QUESTIONS TO THINK ABOUT

In what ways are the demands of feminism linked to those of green politics?

Assess the claim that the achievement of a more feminist society will also be a more sustainable or ecologically sensitive one.

Are women more ecologically sensitive than men? If so, why?

What are the main differences between 'materialist' and 'cultural' ecofeminism?

Which do you agree most with and why?

What would be the main features of an ecofeminist economy?

Do you agree with the ecofeminist view that the devaluing of the work and principles associated with the sphere of reproduction (child-rearing, caring, etc) are a main cause of the ecological crisis?

1. Introductory Readings

Mellor, M, 'Ecofeminism', in Barry, J & Frankland, E.G (eds), *International Encyclopedia of Environmental Politics* [GE170/BARR]

Plant, J, 'Ecofeminism' in Dobson, A (ed.), *The Green Reader* [HC79.E5/DOBS]

Buckingham-Hatfield, S, *Gender and Environment* [HQ1075/BUCK]

Dobson, A, *Green Political Thought*, (3rd ed) [QH541/DOBS] (Chapter 5)

Eckersley, R, *Environmentalism and Political Theory*, [JA75.8/ECKE] (Chapter 3)

2. More Advanced Readings

Evans, J, 'Ecofeminism and the Politics of the Gendered Self', in Dobson, A & Lucardie, P (eds), *The Politics of Nature* [JA75.8/DOBS]

Sargisson, L, 'What's Wrong with Ecofeminism?', in Humphrey, M (ed), *Political Theory and the Environment: A Reassessment* [JA75.8/HUMP]

March 10th

Topic 6
The Environment and Political Ideologies:
Marxism, Socialism, Anarchism, Conservatism and Liberalism

Learning Outcomes: by the end of the tutorial, students should:

Have a basic knowledge and understanding of the ways in which the environment and the environmental crisis has been articulated within different ideologies.

Understand the interaction between these ideologies and green theory.

Come to their own assessment as to the strengths and weaknesses of these ideologies in terms of achieving sustainability and caring for the environment.

Be able to identify and relate common themes in the relationship between these other ideologies and the 'green critique' and environmental concerns.

SEMINAR PREPARATION

A. READING

The class will be divided up into 5 different groups (arranged the previous week), each assigned to a different ideology. Each group will then give a brief presentation as to the main points they would like to discuss as well as offering an assessment of how the ideology deals, thinks and views the environment and environmental problems and how it relates to green political theory.

Everyone should read at least ONE of the following:

Doyle, T & McEachern, D, *Environment and Politics*, [GE170/DOYL] (Chapter 2)

Dobson, A *Green Political Thought* (Chapter 5)

Eckersley, R *Environmentalism and Political Theory* (Chapters 4-6)

B. QUESTIONS TO THINK ABOUT

In relation to the particular ideology you have been assigned, what are its main points, principles concerning the environmental crisis?

Is the ideology able to easily integrate environmental concerns, issues and policies into its overall agenda, or does this require a 'rethinking' or a 'restructuring' of its ideological commitments?

Can the ideology be greened? If so, in what ways or areas can this happen?

How, and in what ways, does the ideology value, think about and view the environment?

Would you describe the ideology as ecocentric, anthropocentric or neither but something else?

1. Marxism and Ecology

March 17th (to be rearranged)

Topic 7

Sustainable Development and Green Political Economy: The Greening or the Transcending of Capitalism?

Learning Outcomes: by the end of the tutorial, students should:

Understand the origins and main principles of ‘sustainable development’ and how it relates to other terms such as ‘sustainability’ and ‘green political economy’.

Be aware of the different political, economic and social dimensions of sustainable development.

Be able to assess the different conceptualisations of sustainable development and debates as to its meaning and implementation.

Be able to outline the main principles and aims of green political economy and its critique of capitalism and neo-classical economics.

Have a knowledge of the alternative economic practices and institutions greens propose and be able to come to their own assessment of these.

Assess arguments for and against the ‘greening’ of capitalism, and whether sustainable development can be achieved under capitalism.

SEMINAR PREPARATION

A. READING

Everyone to read:

Barry, J, *Environment and Social Theory*, chapter 6.

AND

Mill, J.S. ‘Of the Stationary State’, in his *Principles of Political Economy* Book IV, Chapter VI. [HB171/MILL]

And at least **ONE** reading from **EACH** section.

B. QUESTIONS TO THINK ABOUT

What are some of the main principles and ideas of ‘green political economy’?

What are the moral/political reasons why greens criticise economic growth and propose a ‘steady state economy’ to replace a growth-orientated one?

Is capitalism compatible with sustainability? Can a free market economy achieve environmental goals?

Can technological changes solve the environmental crisis? Or does it require restructuring the way the economy is organised?

Is ‘localisation’ (one of the main green arguments) an adequate or desirable response to ‘globalisation’?

Can sustainability be achieved by the ‘greening’ as opposed to reducing consumption?

What would a sustainable economy look like in your view?

General
